

Joseph M. Betz, Ph.D., is the director of the National Institute of Health (NIH) Analytical Methods and Reference Materials Program of the Office of Dietary Supplements (ODS). In this role he oversees efforts to promote development of validated analytical methods and reference materials for botanicals, other dietary supplements, and nutritional biomarkers. Prior to this, he was the vice president for scientific and technical affairs at the American Herbal Products Association and a research chemist at the Food and Drug Administration's (FDA) Center for Food Safety and Applied Nutrition. His research interests lie in the areas of analytical methods for determination of botanical quality. Dr. Betz also is an adjunct assistant professor at the University of the Sciences in Philadelphia; an adjunct assistant professor at the Georgetown University School of Medicine; and a member of the National Science Foundation (NSF) International Joint Committee for Dietary Supplements, the U.S. Technical Advisory Group to ISO/TC 249 (traditional Chinese medicine), and the International Advisory Board on Hong Kong Chinese Materia Medica Standards. He has numerous publications in the natural products area and he continues to work toward ensuring the quality and safety of botanical products. He received his Ph.D. in pharmacognosy from the University of the Sciences (formerly the Philadelphia College of Pharmacy and Science).
