

**Elizabeth N. Pearce, M.D., M.Sc.**, is currently an associate professor of medicine in the Section of Endocrinology, Diabetes, and Nutrition at Boston University School of Medicine. She also is on the management council of the International Council for the Control of Iodine Deficiency Disorders and the co-chair of the American Thyroid Association's Thyroid in Pregnancy Guidelines Task Force. She has served on the editorial boards for *Endocrine Practice*, *Thyroid*, the *Journal of Clinical Endocrinology and Metabolism*, the *European Journal of Clinical Nutrition*, and *Lancet Diabetes & Endocrinology* and as a member of the board of directors of the American Thyroid Association. Her research interests include the sufficiency of dietary iodine in the United States, thyroid function in pregnancy, the thyroid effects of environmental perchlorate exposure, and the cardiovascular effects of subclinical thyroid dysfunction. Dr. Pearce was the 2011 recipient of the American Thyroid Association's Van Meter Award for outstanding contributions to research on the thyroid gland. Dr. Pearce received her undergraduate and medical degrees from Harvard University and her master's degree in epidemiology from the Boston University School of Public Health. She completed her residency in internal medicine at Beth Israel Deaconess Medical Center and her fellowship in endocrinology at the Boston University Medical Center.
